Kansas City Stockyards Collection (SC167)

Introduction

The Kansas City Stockyards operated in the West Bottoms of Kansas City from 1871 to 1991. It was the second largest stockyards in the nation and one of Kansas City’s most important industries. This collection documents the natural and built environment of the Kansas City Stockyards and West Bottoms from 1828-1983. It is a mostly oversized collection of blueprints, maps, architectural drawings, land abstracts, photos, and correspondence.

Historical Sketch

The Kansas City Stockyards were located in the West Bottoms of Kansas City from 1871 to 1991. During the mid to late 19th century, the railroads and cattle industry both converged on Kansas City, enabling the second largest livestock market in the nation to
develop. While the Stockyards grew, other related businesses were attracted to the West Bottoms (also known as the Central Industrial District) in hopes of capitalizing on the booming livestock industry. The integration of industry, commerce, and agriculture—arising from relationships among the Kansas City Stock Yards Co., the American Royal, meat packing plants, factories, railroad terminals, and livestock commission firms—allowed each entity to thrive from the success of the others. Railroads provided shipments of animals and resources. Commission firms helped facilitate smooth transactions between the buyers and sellers. The Stock Yards Company provided a place for the livestock business to be conducted. Meat packing plants bought the animals and turned them into meat for consumption. Area factories used slaughterhouse waste to manufacture useful products. And the American Royal promoted the raising of premium livestock.

By 1914 the Kansas City Stockyards covered over 200 acres, had a daily capacity of 170,000 animals, and employed over 20,000 people. When the Livestock Exchange Building, today an iconic West Bottoms fixture, was built in 1911 it was the largest such building in the world. The year 1919 saw the completion of a large-scale project to renovate and update stockyard facilities. At its height during the 1940s, the stockyards had a year in which they handled more cattle than any other market in the country.

This collection tells the story of the Kansas City Stockyards from the acquisition of land tracts originally owned by one of Kansas City’s earliest settlers, Francois Chouteau, to records of the floods and fires that threatened to destroy the stockyards. Blueprints and drawings attest to the constant rebuilding, expansion, and modernization of the stockyard facilities. Other documents in the collection are representative of larger issues that plagued the city and the region.

Horrendous flooding of the West Bottoms in 1951 signaled the decline of the Kansas City Stockyards. Much of the sprawling yards and related facilities never recovered from the destruction, while a trend toward building packing facilities closer to the livestock began to take hold. After holding auctions to sell its remaining assets, the once-iconic Kansas City Stockyards officially closed in 1991.

**Scope and Content Note**

This is an artificially arranged collection of maps, blueprints, drawings, correspondence, photographs, construction field notes, and other miscellaneous materials from the Kansas City Stockyards. These materials were most likely collected by the engineer for the Kansas City Stock Yards Company, but no original order was discernible.

The collection is arranged primarily by document type, therein by subject, and therein by date. Related documents may be separated between different locations due to size and storage needs. Withdrawal sheets are used to indicate where these items fall within the intellectual arrangement.

**Series 1: Land Acquisitions and Property Boundaries, 1828-1983 and n.d.**
This series consists of five subseries arranged by type of document, thereunder by subject, and therein by date. Items in this series document acquisitions of land and the physical boundaries of the Kansas City Stockyards, as well as the general area of the city.
